

H3021

Model: H3021

The H3021 is a digital temperature and humidity sensor. It is designed for use in a wide range of applications, including industrial, commercial, and residential. The device features a high-precision sensor and a digital display that shows the current temperature and humidity levels. It also has a built-in alarm system that can be configured to trigger an alarm when the temperature or humidity levels reach a certain point.
